a. Approach to liquidity risk management.

The branch manages our liquidity risk in accordance with the Liquidity Risk Management Policy, which is set by Asset and Liability Committee and Risk Management Committee in Hong Kong branch and approved by our head office. The Policy provides a set of principles for the prudent management of liquidity in the tolerance are the stress-testing and scenario analysis, liquidity maintenance ratio, loan-to-deposit and cash flow maturity mismatch analysis. In additions, our policy set a higher internal limit of liquidity maintenance ratio than the statutory minimum to reduce the liquidity risk.

Asset and Liability Committee is mainly responsible for the liquidity risk management in our branch. General Manager is the chairman of the Committee. The members include the department head of Treasury, Risk Management, Accounting, and all members of Treasury. General Manager could also invite other department heads to attend to Committee meeting in need.

(i) Warning index setting

The branch maintains two kinds of the warning indexes which are internal warning index and market warning index. Internal warning index includes profitability, quality of assets, source of assets and funding, financial cost, maturity date mismatch, and regulation of branch and authority. Market warning index includes the bank credit rating, stock price, interbank transaction, and average deposit balance from customers.

(ii) Maintenance of liquidity cushion

Tier 1 assets: HKD 1,288,185,276 Tier 2 assets: HKD 0 (both as of 30/06/2019)

The liquidity cushion assets are easily able to be sold for liquidity demand.

d. Stress testing

The branch perform stress testing quarterly for items as below

(i) Cash flow

(ii) Liquidity maintenance ratio

(iii) Liquidity gapping

The scenarios of 3 cases for our stress testing are "institution-specific stress scenario", "general market stress scenario", and "combination of both". We perform all three scenarios for item (i), and the extreme scenario, "combination of both", for both item (ii) and (iii). The different loss rate of deposit are assumed based on each 3 scenarios.

e. Contingency funding plan

The General Manager of branch should convene the meeting with all departments head to control and assess in case of excess of warning index.
