a. Approach to liquidity risk management.

The branch manages our liquidity risk in accordance with the Liquidity Risk Management Policy, which is set by Asset and Liability Committee and Risk Management Committee in Hong Kong branch and approved by our head office. The Policy provides a set of principles for the prudent management of liquidity in the normal course of business. The primary measures used to manage liquidity within the tolerance are the stress-testing and scenario analysis, liquidity maintenance ratio, loan-to-deposit and cash flow maturity mismatch analysis. In additions, our policy set a higher internal limit of liquidity maintenance ratio than the statutory minimum to reduce the liquidity risk.

Asset and Liability Committee is mainly responsible for the liquidity risk management in our branch. General Manager is the chairman of the Committee. The members include the department head of Treasury, Risk Management, Accounting, and all members of Treasury. General Manager could also invite other department heads to attend to Committee meeting in need. The branch also follows the guidance set forth by the Hong Kong Monetary Authority in Supervisory Policy Manual (LM-2) - Sound Systems and Controls for Liquidity Risk Management.

b. Funding strategies

The branch's main funding strategies include diverse funding source, relationship-building in financial market, and intra-group transactions.

c. Liquidity risk mitigation techniques

The scenarios of 3 cases for our stress testing are "institution-specific stress scenario", "general market stress scenario", and "combination of both". We perform all three scenarios for item (i), and the extreme scenario, "combination of both", for both item (ii) and (iii). The different loss rate of deposit are assumed based on each 3 scenarios.

e. Contingency funding plan
