

The core operating system and SWIFT system of Hong Kong Branch of Taiwan Business Bank (TBB) will be moved to the Information Technology Department of TBB in Taiwan on May 22, 2017. At that time, customer information and transaction details will be stored in the computer system of TBB Headquarter. If Taiwan government agencies or other Supervisory units (such as the Financial Supervisory Commission, inspection agencies, courts and taxation authorities, etc.) need to obtain relevant information of customers according to local laws, after the bank notifies the Hong Kong Monetary Authority and the customer, the Hong Kong Branch of TBB can provide information to the relevant government institutions agency.
